

FOZIYA DAMTEW ABATE

Native Amharic Speaker | AI Language Data Specialist | Full-Stack & AI Automation Engineer

Adama, Ethiopia | foziyadamtew00@gmail.com | +251 93 184 7894 | [LinkedIn](#) | [GitHub](#)

PROFILE

Native Amharic speaker, fluent in English, offering a rare combination for professional AI language-data projects: linguistic fluency paired with a software engineering background and working knowledge of industry-standard transcription, localization, and annotation tools. Experienced in localizing AI systems for Amharic-speaking users, evaluating model outputs for correctness and cultural/linguistic accuracy, and building the automation pipelines that AI training workflows depend on. Comfortable working across transcription, annotation, translation review, prompt evaluation, and technical QA for LLM and audio-model training projects.

LANGUAGES

Amharic: Native speaker (reading, writing, speaking)

English: Fluent — professional working proficiency, technical and conversational

RELEVANT AI & LANGUAGE DATA EXPERIENCE

Amharic Localization — RemedyMate (AI-Powered Health Advisor) 2025

- Localized an AI decision-support tool for Amharic-speaking and offline rural users, adapting model prompts, UI text, and health guidance for linguistic and cultural accuracy.
- Reviewed AI-generated outputs in Amharic for correctness, tone, and clarity, extending automated triage access to underserved Amharic-speaking populations.
- Integrated a domain-specific Ethiopian knowledge base, requiring close attention to native terminology and phrasing.

Full Stack Software Engineer 06/2025 – 09/2025

- Evaluated system outputs and implementations for correctness, efficiency, and edge cases — directly transferable to reviewing and rating AI model outputs for quality.
- Automated verification workflows (CI/CD-integrated test suites), maintaining 99.9% reliability — reflects strong attention to detail and consistency, essential for annotation and QA work.

TRANSCRIPTION, LOCALIZATION & ANNOTATION TOOLS

Transcription: Otter.ai, Rev, Trint

CAT / Localization: SDL Trados Studio, memoQ, Wordfast

Data Annotation & Labeling: Label Studio, Amazon SageMaker Ground Truth, Appen and Scale AI platforms

TECHNICAL & AUTOMATION SKILLS

AI & Automation: LLM API integration, prompt design and evaluation, decision-logic automation, workflow optimization, LangChain, n8n

QA & Review: Requirement verification, correctness evaluation, edge-case analysis, test validation, debugging

Programming: Python, JavaScript, TypeScript, SQL

Other: Git/GitHub, REST APIs, database design

EDUCATION & TRAINING

Data Structures & Algorithms Program Jan 2025 – Feb 2026

- Solved 600+ algorithmic problems across LeetCode, Codeforces, and A2SV training platforms; trained in complexity analysis and technical problem-solving.

ADDITIONAL PROJECTS

Mesob Market — Ethiopian Multi-Vendor E-Commerce Platform

React, Next.js, Node.js, Express.js, MongoDB, TailwindCSS

- Built backend APIs and database schemas for a multi-vendor e-commerce platform serving the Ethiopian market.
